### TUBERCULOSIS SKIN TEST (TST)

HDC screens for TB to comply with the mandates issued by OSHA and CDC and to prevent the spread of TB. The TB test is a Tuberculin Purified Protein Derivative (PPD) given intradermally (under the skin).

Please Answer the Following Questions:	Yes*	No	Comments
Have you ever had a positive TB test?			
Do you have a persistent, productive cough?			
Do you cough up blood?			
Do you currently experience unexplained shortness of breath?			
Do you currently experience unexplained chest pain?
